PROJ 216 Assignment 2

Working in your Threaded Project groups (from PROJ 207) create Term 1 Project Gantt Chart schedule that includes:

- A comprehensive set of tasks.
  - Each task has a name, start and end date, and duration. Most tasks are auto scheduled
  - Provide detailed tasks for Phase 1 of your projects
- Summary tasks: these could be the project phases
- Milestones: these could be project presentations. If a milestone has a fixed date, it could be manually scheduled
- Identify reasonable predecessor relationships between tasks
- Create a resource sheet and assign resources to tasks. Avoid assigning each task to everybody; remember that it is best to make one person responsible for the task even if others may help with it. Make sure there are no overallocated resources.

Submit one copy per group into Assignments Dropbox on D2L. It does not matter who submits: the mark will be duplicated for all group members and feedback will be provided through the person who submitted).
